

JULIEN ESTERBET

Product-minded full-stack developer

Business applications · Web products · Web3

Full-stack developer and IT analyst turning business needs into useful, reliable applications with Java, Angular, APIs and document workflows. My background combines product understanding, delivery quality and hands-on Web3 experiments.

PROFESSIONAL EXPERIENCE

Software Developer and IT Analyst

PREPAR-VIE · Permanent contract · Paris · April 2025 - present

- Design, enhancement and maintenance of Java and Angular applications supporting unit-linked life insurance products.
 - Analysis of business requirements and translation into technical solutions with functional teams and partners.
 - Development of document batches, API integrations and SQL, XML and JSON data workflows.
 - JUnit and Mockito testing, GitLab/Jenkins integration, documentation, refactoring and production delivery support.
- Skills: Java, Angular, REST APIs, SQL, software quality, CI/CD and functional-technical analysis.

Business Analyst

PREPAR-VIE · Fixed-term contract · Paris · August 2024 - January 2025

- Requirements gathering, functional specifications and analysis of regulatory impacts.
 - User acceptance test coordination, defect follow-up and support for business teams through validation.
 - Document digitalisation through APIs and OpenText Content Server in a life insurance environment.
- Skills: Business analysis, UAT, coordination, stakeholder communication and document management.

Financial Software Developer

PREPAR-VIE · Internship · Paris · January 2024 - July 2024

- Enhanced and automated internal financial tools for market data and portfolio management.
 - Analysed user needs, improved processing reliability and streamlined workflows with business users.
- Skills: Financial systems, automation, data analysis, business understanding and problem solving.

Blockchain Consultant and Developer

SIB · Internship · Rennes · April 2022 - July 2022

- Applied research into Ethereum, smart contracts, data integrity and their use in healthcare.
 - Designed a Solidity and web prototype for certifying document references.
 - Presented technical choices while addressing security, traceability and confidentiality considerations.
- Skills: Solidity, Ethereum, technical research, prototyping, data security and communication.

Manager - student position

McDonald's Gare · Rennes · October 2018 - March 2022

- Operational supervision, team support and priority management.
